

6th IAGE Cadaver Course

Completed Successfully

FEW GLIMPSES OF THE COURSE WITH FEEDBACK

1. Sir, it was wonderful workshop. Our tutor was wonderful, patient, never getting tired. All faculties who came from far and near leaving their practice for us. This course makes us learn anatomy of pelvis, definitely make us more confident, giving more justice for our patients. Thanks to all faculties once again (I don't want to miss any name.) Thanks to all Stalwarts of laparoscopy.
2. It was better than what we expected from course and lot of learning experience from all tutors and masters. Thanks a lot all tutors and masters for giving their valuable time to make such a fantastic and life time experienced program 🙏😊. It will be definitely beneficial for all of us in our future practices.
3. I have taken training from many national and international training programs, including CICE, France. This training is the best training amongst all.
4. Respected Krishnakumar sir as you had said — it is indeed a life changing experience for me. This cadaver course has removed the fear while doing endoscopy as anatomy has become crystal clear. Working with so many stalwarts at a time was life changing indeed.
5. Was an absolutely amazing Session sir. 🙏🙏Kudos to the entire team of IAGE for creating such training programs. This is how an apex organization should inculcate the culture of training.
6. Humbleness is a sign of greatness. I think 6th cadaver course is living example for this. Not Only Krishnakumar Sir, and Puntambekar Sir but also all other tutors have given their best, so that we can learn pelvic anatomy. Sir, all of you are not Only Great Surgeon but also you all are also great teachers. I hope all of us learned apart from pelvic anatomy, enthusiasm from Puntambekar Sir, Calmness from Pandit Sir, wisdom from Ramesh Sir, energy from Vivek Sir Ameya Sir and Vidya Madam and Nitin Sir and of course a combination of all from Krishnakumar Sir. All of you stay healthy to teach many people like us. Feeling very proud as a member of IAGE for such a wonderful course.

Long live IAGE
